

Sausage Rolls

Display Suggestions

Thank you for your order. We appreciate your business.

We are a family owned, wholesale bakery and USDA establishment. We pride ourselves on offering you an excellent product at an exceptional price. If you have any questions or comments about our product, please do not hesitate to contact us.

Mitchell's Sausage Rolls can be displayed and sold in several ways. They work well on a roller grill, in a warming display, as a menu item, and in the refrigerator or freezer.

If you purchase our product individually packaged, they come in an "ovenable" package. This package can be used for reheating in both the microwave and oven.

If you sell them on a roller grill, we recommend that you take them out of the package and put them in the microwave for approximately 15 seconds before putting them on the roller grill. This will speed up the warming process. You do not have to remove them from the package first, but we recommend taking care to open the package carefully (i.e. using scissors) so you do not dent or damage the product during removal. Damage to the product could affect how well it rolls.

If the product is not as round as you'd like, you can gently squeeze it to help form its shape.

Also, given their size, we recommend putting a space between them in the horizontal rows. This will prevent them from interfering with the proper rolling and warming of the product. You can place other, smaller products in the rows in between the sausage rolls.

These are handmade sausage rolls. As such, they can vary slightly as a result of the baking process. If they do not roll one way, turn them around and they should roll the other direction.

Thank you again for your business.

Have a great day!

Kindly,

Homeland Baking and Mitchell's Sausage Rolls
